

## **MILAN 2011 GCIG STRATEGIC PLANNING MEETING**

### **OUTCOMES**

#### **Membership**

- No ceiling on member groups
- Keep 6 reps per group
- CCRN chair to be co-opted onto Board
- Closer group performance
- Mentorship Guidelines plus 2 mentors for each new group including harmonization

#### **Meetings**

- 1 traditional meeting per year on current format
- 1 meeting including a consensus based approach to address and prioritise unanswered questions/gaps particularly what can GCIG do that is unique.
- Drop educational session

#### **Trial Issues**

- Trials being presented too late...concentrate on new concepts/trial development
- Harmonisation important...radiation/dosing etc....right from the start...
- Statistics obviously important esp re shared databases.
- QA uniform across CCRN and GCIG
- Auditing/Monitoring GCIG trials...being reviewed...topic for 'consensus meeting'?...QA subgroup of Board to address
- More focus on translational aspects de novo.....ad hoc so far eg biobanking...develop a template across all trials
